

PREVENT PURSUITS

BEFORE THEY START

**1 officer is killed every
6 weeks during a pursuit**

**1 person dies every
day due to a pursuit**

**70,000+ pursuits
occur every year**

**94.3% of pursuits use
NO prevention method**

About Us

Let's face it – the public's view of police pursuits is growing progressively worse. People want criminals off the street, but the risks associated with pursuits are often too great.

We design our products at an intersection where crime stopping efficiency meets the safety and security of the community and your officers. Our goal is to develop tools that will impede crime and eliminate the risks associated with pursuits.

By implementing the knowledge of police officers and thinking beyond the traditional view of crime prevention, the XHAUSTR has proven itself to dramatically reduce the risk of pursuits.

The XHAUSTR is inserted into the tailpipe of a vehicle and expanded in seconds to create a seal. Once the vehicle is started, no combustion can occur and the engine stalls. It's that simple – a safe and effective vehicle disabling device that causes no damage and is reusable.

Kits Include

Each XHAUSTR kit comes in a compact tactical nylon bag that is easy to transport.

The XHAUSTR comes in three different sizes that fit into the vast majority of vehicles on the roadway. Two of each size are included.

Expansion ratchet with built-in LED light allows for installation in the darkest conditions.

Ideal For

- Stolen Vehicle Task Forces
- SWAT Teams
- Fugitive Apprehension / Warrant Teams
- Narcotic Task Forces
- Bait Cars

Full Guarantee

If you aren't satisfied, neither are we. XHAUSTR Industries stands behind each of its products and is focused on the safety of the officers who use them.
